His Lordship said the offence the prisoners had been found guilty of was a very serious one. The jury had particularly there had been any violence or not, and they concluded that there had been. The prisoners were liable upon this conviction to sentence of penal servitude for life, and hree whippings of 50 strokes each. ordship was only sorry that the other two men who had taken part in the affair had not been saight and it was quite possible they might have been the worst-certainly the man who entired the complainant into the house deserved most severe punishment. The sentence of the court was that they should be kept to penal servitude for five years, and during the time they were in gaol, receive 25 strokes of the

attan each upon the breech. Wong Chun Leong and Ko Ting Kwai, who had been found guilty of robbery with violence on the road from Wong Nei Chong to Tytam, were also put into the dock.

Dr. Avres gave evidence as to the nature the punishment these men had received at the hands of the complainant and his coolies in the struggle on the road. One had been in Hospital 15 and the other 21 days over it, and it was at first thought one of them had a broken arm, but the limb only turned out to be very badly story is probably about as correct as the state- braised. CORRESPONDENCE

Ve do not hold ourselves responsible for the opinion expressed by our Correspondents.] MUNICIPAL GOVERNMENT FOR VICTORIA.

TO THE EDITOR OF THE "DAILY PRESS." SIR. -In reviewing the history of this Colony for the past decade it is interesting to contrast what private enterprise has done as compared with official. Had the latter advanced in the same ratio as the former how totally different

During the past ten years we have seen factories and handsome buildings erected, reclamations carried out, the wilderness of Peak changed into a small town, and the desolation of Kowloon converted into what promises to be the storage ground of this vast depot, and this all by private energy and enterprise. And what have Government done during this period to keep pace with the noble example set them? After many years absence from the Colony I find it difficult to discover strong reinforcements arrive from Saigou. any visible improvements worthy the name the drainage has year by year gone from bad to worse, the foreshore of the harbour daily grown more pestilential, the uninterrupted Prave is as far off being an accomplished fact as in 1874. the Wong-nei-chong meadows are still unreclaim-(although I really believe this work is to be still the hideous sinks of filth Pedder's Wharf has never been enlarged. And now let us! see what improvements have been made. The Kennedy Road certainly is one and really the forgotten, and this certainly takes a front place. The Tytam water works will probably rank as a great engineering work, but it is well contested one on the part of the Chifor the requirements of the place.

One man who had been shot clean through the left shoulder, in the region of the collar bone, after a week or ten days in with his comrades to nursing his wound. It is supposed that the bullet which let daylight pass through him, had pierced the upper part of the lungs; if true, it is perfectly wonderful how quickly Chinamen recover from serious wounds which would lay foreign soldiers up for months. Another man, seven days after the French landing and the smart little battle which followed, walked into hospital with his skull wounded-brain visible, I understand. This man is Mr. Mackean for stealing things belonging to getting along all right, but it is doubtful two Enropean constables, was brought before the | whether he will live very long, especially if compression of the bone of skull takes place. Another serious case was that of a man shot through the lungs; when the wound was oxposed the air passed through it into the lungs, and when the patient breathed a whistling sound escaped from it. Several men shot through the thighs and arms, the bones being splintered into many pieces, bore the pain most heroically. When there were some seventy men in hospital on the evening of the 8th there were but few groans to be heard, although several men were shot in three different parts of the body. A soldier came to hospital a few days ago with a bullet in his calf. He had carried the bullet in his leg for 9 or 10 days. Hearing how well his comrades had been troated ho thought he would visit the foreign doctors. Dr. Browns extracted the bullet and off he went back to the front. There is certainly nothing mean about such chaps! Stray wounded from Kelping find their way here, and receive attention: Many instances like the foregoing might would be the appearance of the place at the be recorded, but we shall see it all later in the Mission Hospital Report for the year, drawn up by Dr. Johansen. This year's medical report ought to be exceptionally interesting, and satisfactory alike to the promoters of such an establishment as well as to Dr. Johansen, whose ser-

TAMBUL 20th October, 1884 Fine cool weather. Tameni is looking its best. The people in the town are quiet, and the six or seven thousand soldiers and Hillman in the neighbourhood might be a thousand miles away for all the noise and bustle that takes place. One may say that perfect quietness now reigns here, and it is a pity that war and its concomitant evils ever visited the island. It is nouse, however, by a stroke of thought to try to altogether too elaborate and expensive a scheme nese, who are rather finahed with success and are envious again to meet the enemy. which has been postponed till to-day at noon. The Champion and Cookchafer have been signalling a good deal, and Captain Boteler went out to the corvette on her arrival yesterday. Stores have been brought to the Cockchafer, sufficient to last her for a long period. With the sailors and marines on shore, she must be short handed on board. A few extra hands from the Champion Fine weather, getting much cooler daily. One in the shape of marines would be a welcome addition, especially if we have to fight for our for the first time since the bombardment. It lives when the French land and defeat the soldiers and Hillmen stationed in the neighbourhood of Hubei. What the effect will be on the Chinese generally, when they hear that the whole island is blockeded, we have to wait and see. If the effect shews itself by disturbances at now in Hospital number only about a dozon; a | Banez and Twatutia then foreigners in business here, who are all English, will be the first sufferers. It has hitherto been thought that steps would be taken against the fort and the military alone, but the blockade means a deathblow to trade and a serious danger to all foreigners now remaining in Hübei. Kelung and Twatntia have been deserted by foreigners, but at Hubei, we make our stand. Hubei is not a Minister, has caused his yamen to be rebuilt, and business place at all. Ships anchor there, and discharge cargo; the Consulates, Customs, and residences of merchants and missionaries are here and the Cockchofer, watches over us as well as she can. But how will it be when the French forces land again, and when, as is supposed, the Chinese army will be defeated? We shall again have to undergo the dangers of a third bembardment, and if the Chinese troops perhaps, owing to the power of observation with and Hillmen have become at all demoralised it | which that gentleman appears to be gifted, to will be expecting too much to suppose that they will not molest foreigners on shore, and on shore we ought to remain until driven on board the gunboat, for who will guard our properties if

we desert them? The consensus of opinion here cannot be ascertained readily, for no meeting has been called at the Capital, the lady of the American Minister together to discuss our position, which day by H. E. General Foote; but there are hopes that day is becoming more and more perilons. There before long we shall have the happiness to enjoy can only be one idea, however, on one point, and ladies. that is that the English Admiral should order the Champion or some other English man-of-war another valuable addition to our foreign comto remain outside the port, to watch events, so as munity-Captain Zembsch, Consul-General for to be handy in case the worst comes to the worst. If the blockade is protracted and delayed for a month or more, how are we to get supplies of to be hoped the eagle-eyed "iron" chancellor of necessaries, all of which come from Amoy and Hongkong? Many persons are already running short, and great disappointment prevails now that it is known that those ordered and on the way will not arrive. The short notice scarcely permits of any one to arrange his affairs and clear out, should they be so disposed, and after to-day there will be no chance whatever of leaving until Tamsni is taken.

It is not perhaps generally known that nineenths, almost the whole, of the foreign trade of Takno and Taiwanfoo and of Tameni and Kelung is in the hands of British firms, and in the same way almost all foreign properties belong to Britishers. The tea and coal trade of the North and the sugar trade of the South have been developed almost entirely by British enterprise, and now the whole trade has been brought to a standstill and British merchants must necessarily suffer. No one here has so far grumbled in the ordinary British style, but the time has now arrived when it is necessary to look shead and to calculate the injury to British interests which must soome if the island is blockaded for any length of time-The business of every one of us here has been very seriously interfered with for some months at a most inconvenient time of the season, and great loss will show itself before the end of the year if Tameul-and Twatutis are treated like Kelung has been. Our customers too, will have some less to bear, for America looks for some which was constructed by the local Public Works 300,000 half-chests of Formosa Oolongs annually, and other countries look for supplies of spear. The stoppage of the coal trade will be felt locally and shipping interests will suffer also, if the blockade is not removed. - Time will not permit us to write more. The Galissonnière left for the South this morning, so that we have only the Duquey Trouis to guard the entrance of the 55 years 25 of which have been spent in Mission river. The Champion has cleared out, perhaps for Kelnner and Amoy.

AFFAIRS IN KOREA

CHEMULPO, 11th October. The last day of September has been quite an eventful one in the modern history of Korea; the first grand review took place in the Capital, before General Han (the Commander-in-chief), of one of the foreign-drilled regiments. About noon the troops put in an appearance on the parade ground before the East Gate, preceded by a brass band, and immediately afterwards the Generalissimus arrived with a munarous suite and was received with a thundering salute of cannon. The flag of the regiment was planted in front of the General's tent' the Colonel in charge reported to the gallant old warrior, and about a quarter of an hour later the march past the General's tent took place, the band striking up some soul-stirring martial tunes. When the band commenced playing, a comical incident occurred; along row of pack, horses was passing the parade ground, and as soon as the music commenced, the ponies bolted and sent both their cargoes and mafoos flying about to the right and left, to the great amusement of the Vu l'état de représsilles existant entre la France et | numerous spectators. It is not known whether no points belonged to the conservative, antiforeign party; but it is known that happily no particular harm was done. After the parade. Formose comprisentre le Cap Sud (Latitude 21 0 50" | which was a great success, a minute inspection ord, Longitude 118 032 Est) et la pointe Dôme (La. of the troops, (who were a well-fed and well-led titude 24° 30' Nord, Longitude 119° 33' Est) on pas body of men), took place, and afterwards the his guests at a sumptuous repast in his own atres apront un delai de trois jours pour achever tent, with genuine oriental hospitality. Amongst the company were three-foreign-gentlemen, the I sera proced contro tout batiment gul tenterait guests of Herr von Möllendorf, who had received special invitation to be present at this grand military spectacle. After dinner the troops were put through all sorts of evolutions and manœuvres, mostly under fire, and they were certainly equal to the occasion, proving that they searcely, if at all, could be outshone by any

> other body of foreign-drilled troops. The Capital is now ornamented by several buildings of foreign style: amongst them the Mint, the Arsenal, the Japanese Legation, and several others. The most conspicuous one is certainly the Japanese Legation, and well worth seeing; but if anyone should wish to visit the Capital of Kores care must be taken to arrive there before the gates are closed at night; if not, it might happen what occurred to somebody whom know.—namely, the guto was closed in his face and he had to sit in his chair all night before it. though not exactly like Hannibal anteportas: fortunately he happened to have a bottle of lager beer and some bisquits with him, which were made to do duty for dinner. " dowever, next night he made up for the discomforts of the previous dinner, thanks to the hospitality of his Soul friends; but the story circulated at his expense that after dinner he fancied to again be before the walls of Soul, and went to his chair, quietly sitting down until daylight, waiting for the Korean Cerborus at the gate to open, is a

most malicious invention. Some gams which recently were handed over to the Government so much pleased H. M. the King, that he sent a body of soldiers, headed by buglers, to P. von Möllendorff, bearing some valuable Royal presents for that gentlemen. I hear the guard of the Japanese Legation, about a company of infantry, is shortly to be relieved: the Japanese troops, at present in garrison here, make a very favourable impression. His Excellency Chen Shu Tang, the Chinese before winter is setting in. it will be of quite an imposing appearance, worthy of the Great Celestial Empire, which he so worthily and success-

fully represents in this country. The British Consul General, Mr. W. G. Aston, has been recently in Chemulpo for a few days, to inspect the foreign settlement during the absence of Mr. Vice-Consul Carles, who is away on a tour of exploration to the Northern provinces, which trip may be of very happy results. judge by some valuable reports which he has made on certain former occasions, regarding the yet undeveloped resources of this fine country. to a close at the Yokohama Criminal Court on the I4th October. Moritani Takigo, Natsukari Hirokicki, and seven others, were indicted for having with premeditation murdared a rich man by the name of Rogi Usaburo, living at Osumigori, Kanagawa Ken, on the 15th May last. The circumstances under which this murder was committed seem to be these; that the accused all owed more or less money to their victim, and being anable to pay their debts, conspired to kill him, binding themselves by a covenant signed with blood; and finally carried out their project. But one of the criminals revealing the crime to the authorities, the accused were all easily arrested and sent to trial. Except in the case of one of them, the crime was proved and the prosecutor prayed for a sentence of death. while their counsel pleaded extenuating circumstances for their benefit. The court reserved judgment, which will be given on the 18th instant. -Japan Gazette.
